empower charts

empower® charts – Complex charts. Effortlessly created.

Visualize complexity

Gantt and waterfall: our dream team for clear visualization

- Use empower® charts for the planning and reporting of projects: Gantt charts allow you easily display activities and milestones on a timeline. You can also use waterfall charts to display steps in bar charts. Growth indicators as well as reasons for need for cost-cutting are clearly and comprehensibly emphasized.

Functions:

Gantt charts

- Flexible adjustment of timelines
- Visualizations (milestones, emphasis, etc.)
- Integrated and expandable vacation calendar

Waterfall charts

- Display of any increase and decrease
- Calculation of (sub)totals

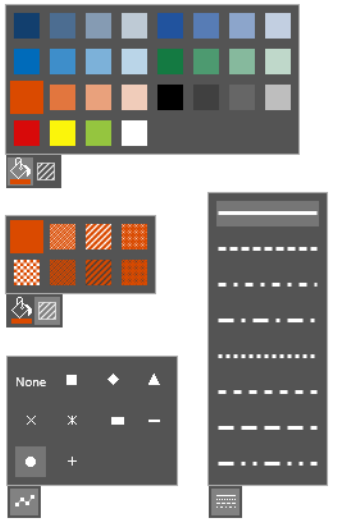
Uniform design

The star in every chart: your brand

- empower® charts not only creates elegant charts, but they will also conform to your brand 100%. During initial setup we will ensure that all your charts types will be completely in line with your corporate design. During this phase we work closely with you to ensure that every and every detail is just right. Want to change something later? No problem: all settings can be centrally adjusted. All users have the ability to set individual formatting, but only within the corporate design guidelines. This way your brand always takes center stage – even in charts.



Functions:

- All charts conform to corporate design
- Restricted fonts and font sizes
- Your corporate fill and line colors
- Only approved symbols and lines
- Settings are administered centrally

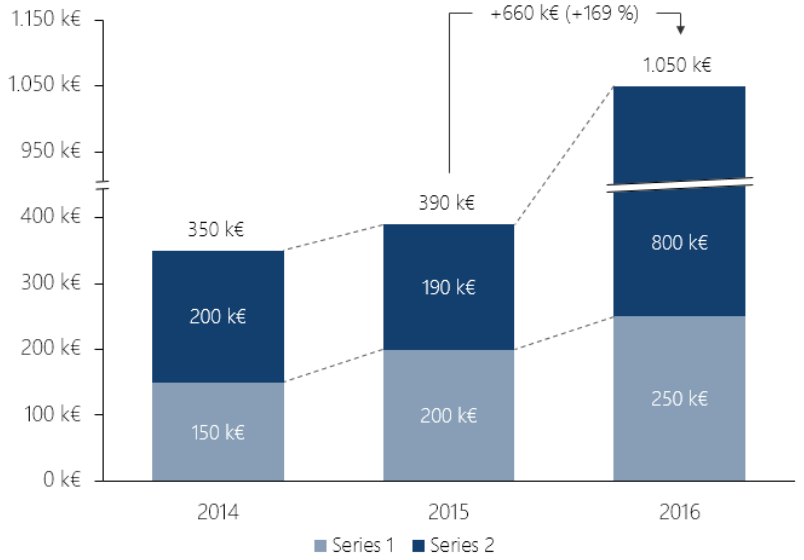
Work efficiently

Break the limits: create charts with arrows, breaks and Excel links

- Frequently, users miss a special something when working with PowerPoint – there is lack of features to give the presentation a bit more oomph. Have you tried to display absolute growth or the annual average (CAGR) with an arrow in PowerPoint? No problem with empower® charts. Inserting breaks to manage outliers as well as formatting numbers can be done with a few clicks. A further highlight: charts can be effortlessly linked to Excel data and all charts can be managed within one window.



Functions:

- Stacked and grouped column/bar charts
- Line charts
- Dot and bubble charts
- Pie charts
- Area charts
- 100% chart mode
- Combined charts
- Growth, delta and CAGR arrows
- Connection and value lines
- Breaks
- Column totals
- Comprehensive number formatting
- Comprehensive chart formatting
- Excel linking

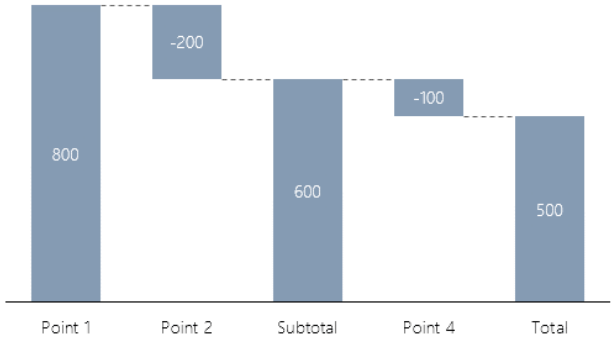
Advantages of empower® charts vs. PowerPoint charts

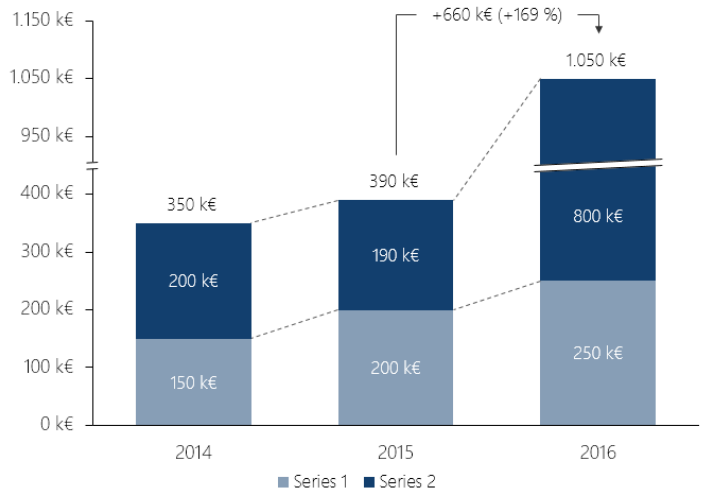
Addition of essential chart types

empower® charts offer users the two essential chart types that are not natively supported by PowerPoint: Waterfall and Gantt chart.



Arrows, lines and number formats

Users frequently want to display growth, CAGR, average, delta and benchmark lines. They also want to use specific number formats. empower® charts provides all these functions with just a click of a button.



Easy and uniform charts

empower® charts enables users to create perfectly designed charts that comply with corporate design standards. All relevant chart settings: bar totals, bar width, font size, etc. are easy to access. Native PowerPoint either does not have these settings or makes them hard to find.

Advantages of empower® charts vs. other chart solutions

1 Save time adjusting

- empower® charts are based on native PPT charts. Charts can therefore be inserted into placeholders with no issues.
- PPT-layout changes are therefore possible with the click of a button
- Charts do not extend beyond the slide or drawing area when adding arrows or data arrays.
- Users save time with easy-to-use features, and slides look more professional.

2 Profit two-fold thanks to native PPT charts

- As empower® charts are based on native MS Office charts, the user has two key advantages:
- Created charts can, at the very least, be manually adjusted on any MS Office system.
- You don't only benefit from the ongoing development of empower® charts but also from charting improvements included in Microsoft Office updates.

3 Intuitive & easy to use

- Using empower® charts is simple and intuitive.
- Other solutions are more complex to use or provide a multitude of settings that the average users would never need.
- No bloatware - empower® charts focuses on the essentials and offers its functions in a clear and logical layout.
- empower® charts is very easy to learn. The user can immediately begin creating professional-looking charts. No time-consuming trainings are required.

4 Uniform charts in your corporate design

- empower® charts allows you to centrally define the look of all charts, colors and elements.
- Chart design is uniform throughout the company – just the way corporate design defines it.
- Other solutions require the individual user to set the design of their charts resulting in wasted time and non-uniform slides.

5 Significantly more cost-effective

- Compared to similar solutions empower® charts is significantly more cost-effective.
- A lower priced tool will enable a more economic distribution to both power and occasional users
- Our license model allows savings of up to 50% - 75% on your current charting licensing fees.
